

Slide-out for Caravans & Motor Homes

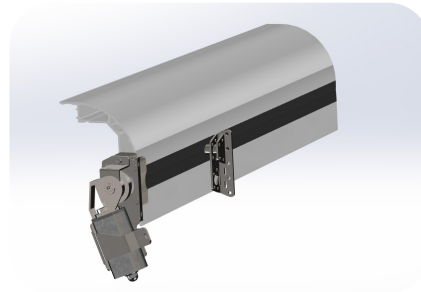

The InnoSlide is designed to create more living space in a motorhome or caravan. The system is watertight, has a stylish design with radius corners, closes flush against the wall and is lightweight.

The system is self-supporting and does not require reinforcement of the vehicle chassis or extra connection to the chassis for installing. The Slide-out is operated by 4 computer controlled motors, the computer constantly checks if the motors are in line and corrects or stops the motors if they are obstructed.

Included parts

The set contains the following parts:

- 4 Assembled corners with motor and drive system.
- 1 Outer frame existing of 4 corner pieces(450x450mm) and 4 straight pieces cut to size.
- 1 V-seal that works as a wiper and keeps the water out of the inside of your vehicle.
- 1 Controller that keeps the corners synchronized.
- 1 Remote to control the slide.
- 1 Set of wall clips to fix the frame to your vehicle.
- 3-5 Frame rollers, these rollers prevent the bottom of the slide-out from bending.
- 1 Emergency key so you can still retract the slide if one of the motors fails.
